TRIPURA STATE POLLUTION CONTROL BOARD

(A Govt. of Tripura Organisation)

F.19 (7)/TSPCB/RRC/ 8929-32

July 23 ,2020.

To
Shri D. P. Mathuria
Executive Director- Technical
National Mission for Clean Ganga
Ministry of Jal Shakti (MoJS)
1st floor, Major Dhyan Chand National Stadium
India gate, New Delhi-110002.

Sub. : Submission of monthly progress report of six identified river stretches of Tripura for the month of June, 2020.

Sir,

In compliance to Hon'ble National Green Tribunal Order dated 6.12.2019 in O.A No.673/2018 in the matter of news item published in 'The Hindu' titled "More River Stretches are now critically polluted: CPCB", please find enclosed the monthly progress report for six identified river stretches of Tripura for the month of June, 2020 in the prescribed format for kind information.

Enclosed: as stated

Yours Sincerely,

23/7/2020

(Bishu Karmakar)
Member Secretary

Copy to:

1. PS to the Secretary, Science, Technology and Environment, Government of Tripura for kind information of the Secretary.
2. The Director, Science, Technology and Environment, Govt. of Tripura for kind information.
3. Mr. A. Sudhakar, DH, WQM-1 Division, Central Pollution Control Board, Parivesh Bhawan, East Arjun Nagar, Delhi-110032.

PARIVESH BHAWAN
Pandit Nehru Complex, Gorkhabasti,
Phone : (0381) 231 2589 / 232 2455
232 2462 (Chairman), 232 8792 (Member Secretary)

MONTHLY STATUS REPORT OF 6 (SIX) IDENTIFIED RIVER STRETCHES OF THE MONTH JUNE, 2020 FOR THE STATE OF TRIPURA

- In pursuance to the Report of the CPCB and in compliance of the directions of the Hon'ble NGT, Principal Bench, New Delhi, vide its Order dated 20.09.2018 in O.A. 673 of 2018, the State Government constituted a **River Rejuvenation Committee (RRC),** vide its Memorandum dated 01.11.2018. The Committee is also functioning as the Monitoring Committee for the Action Plans already prepared for rejuvenation of 6 (six) identified river stretches as mentioned under 30 above. The Committee comprises the following officers of the State Government:

1.	Director, Science, Technology & Environment	Chairman
2.	Director, Urban Development	Member
3.	Director, Industries & Commerce	Member
4.	Member Secretary, TSPCB	Member Secretary

The Committee is working under overall supervision of the Secretary, Science, Technology and Environment.

- Besides the above, as per directions of the Hon'ble NGT, Principal Bench, New Delhi, the State Government has also constituted District-level Special Environment Surveillance Task Force (SESTF) for each District.
- The River Rejuvenation Committee has prepared the Action Plans for individual river stretches as suggested by the CPCB. The Action Plans were sent to CPCB on 28.06.2019. The said Action Plans have been uploaded in the TSPCB website.
- The 3rd meeting of River Rejuvenation Committee (RRC) Tripura was held on 08-06-2020 under the chairmanship of the Chairman, RRC to review the progress of the implementation of action plan. (Minutes of the meeting is annexed as **Annexure 1)**
- Tripura State Pollution Control Board (TSPCB) is conducting water quality monitoring on monthly basis under National Water Quality Monitoring Programme (NWMP) of Central Pollution Control Board for the following six identified polluted river stretches in the State:

River	River Stretch
Burigaon	Along Bishalgarh
Gumti	Telkajila To Amarpur
Haora	Agartala To Bishramganj
Juri	Along Dharmanagar
Khowai	Along Teliamura
Manu	Along Kailashahar

- From the analytical report for all the monitoring locations of six rivers entered in EWQDES portal of CPCB by TSPCB since June, 2016, it has been observed that the BOD values for the six identified polluted river stretches were within prescribed standard limit (3 mg/l) except for some specific months in respect of Gumati river (June, July, August & September, 2016 at Sonamura location), Haora river (June & July, 2016 at Chandrapur location; June to August, 2016 at Dashamighat location) Juri river (June to November, 2016 at Krishnapur location) Manu river (June to August, 2016 at Kailasahar location). It is relevant to mention that for all the monitoring locations of Khowai river, the BOD value was within prescribed standard limit (3 mg/l) since June, 2016. The month wise latest analytical report in respect of BOD values for the six identified polluted river stretches are at (**ANNEXURE-2).**
- All concerned Departments / Organizations have been directed to take necessary steps for effective implementation of the Action Plans so that the water quality of the 6 (six) identified river stretches remains within prescribed standards.
- The River Rejuvenation Committee, Tripura review the action taken on implementation of the Action Plans for rejuvenation of the six identified river stretched on regular basis. The minutes are being uploaded in TSPCB website.
- The Chief Secretary, Tripura also monitored the action taken on implementation of the Action Plans for rejuvenation of the six identified river stretched every month in the State Level Committee meeting through video conferencing with all DMs.
- As per the decision of the 2nd meeting of Central Monitoring Committee held on 19.02.2020, the state of Tripura has nominated the Member Secretary, Tripura State Pollution Control Board as the Nodal Officer for submission of Monthly Progress Report to Concerned Authorities. The Memorandum is annexed as **(Annexure–3).**

I. Details of Industry and ETP/CETP:

- Total number of industries/industrial estates: A total of 179 industries are present within 500 meter of the catchment areas of the Six identified river.
- 0Total no's of industries having ETPs: 18 Nos (within 500 meter of the catchment areas of the Six identified river)
- Total existing CETPs : 1 CETP at Budhjungnagar Industrial Estate, Agartala.

v. Solid waste management

- Total MSW generation (TPD): 337.3 TPD Municipal Solid Wastes are being generated from the Municipal areas of the catchment areas of six identified river stretches.
- Existing facilities : A 250 TPD capacity Solid Waste Processing Plant (composting) have already been set up at Devendra Chandra Nagar which is operational. This Plant is also catering the processing of solid waste from nearby 4 smaller urban local bodies, i.e., Bishalgarh Municipal Council, Mohanpur Municipal Council, Ranirbazar Municipal Council & Jirania Nagar Panchayat. These 4 urban local bodies are located within 10-15 Kms. from the periphery of Agartala city and it is economical for them to transport their solid waste on daily basis to the 250 TPD SWM plant at Agartala rather than to operate and maintain their individual solid waste processing plant.
- In addition, door to door waste collection, source segregation and processing etc are being done by other ULBs.

vi. Bio-medical/Hazardous/Plastic waste generation

- Total Bio-medical/Hazardous/Plastic waste generation: The generation of Bio-medical/Hazardous/Plastic waste in the catchment areas of the **six** identified river stretches are as follows:

Type of Waste	**Waste Generated**
Bio medical Waste	0.283 TPD
Hazardous Waste	Nil
Plastic Waste	2.5 TPD

- Total no. of hospital and bio-medical waste generation/treatment
  A total of 11 hospitals are present in the catchment areas of the six identified river stretches.
- Total units generating hazardous waste/treatment facility: Nil

Further, Detail Status on Implementation of Action Plan For Restoration of 6 (Six) Identified River Stretches of Tripura in the prescribed format are as follows :

DETAIL STATUS ON IMPLEMENTATION OF ACTION PLAN FOR RESTORATION OF 6 (SIX) IDENTIFIED RIVER STRECTHES OF TRIPURA

Name of The River: Burigaon River

Sl. No.	Activity to be monitored	Timeline	Submission of Progress by the State/UTs- Compliance Status
1	**Ensure 100 % treatment of sewage at least in situ remediation**	31.03.2022	All the ULBs has been directed to adopt in-situ Bio-remediation and phyto remediation of sewage in drains. **(Annexure-4).** A comprehensive action plan is under preparation for 100% sewage Management in the state. Finalization of technical specifications/tender documents for installation of 15 Faecal Sludge Treatment Plants (***FSTPs***) of 600 KLD capacity for 15 ULBs including Bishalgarh Municipal Council are going on and will be completed shortly.
	Commencement of setting up of STPs and Connecting all the drains and other sources of generation of sewage to the STPs must be ensured	31.03.2022	Channelization including diversion of sewage generated from household townships to sewer lines /interception of all the drains presently carrying sewage will be treated through Bio-remediation process.
2	**Time line for completing all steps of action**	31.03.2022	All the ULBs has been directed to construct FSTPs as the water quality of all the six rivers and stretches are within prescribed

Sl. No.	Activity to be monitored	Timeline	Submission of Progress by the State/UTs- Compliance Status
	plans including completion of setting up of STPs and their commissioning		standard. In addition, all the ULBs has been directed to adopt in-situ Bio-remediation and phyto remediation of sewage in drains. **(Annexure-4)**
3	**Chief secretaries may set up appropriate monitoring mechanism at state level.** **Specifying accountability of nodal Authorities not below the secretary level.** **Chief may have an accountable person attached in their office for this purpose.**	Continuous activity	State level committee has been notified under the chairmanship of Chief Secretary to Monitor the overall progress of the compliance. In addition, a committee has been constituted namely the River Rejuvenation Committee (RRC) to look after the progress of the implementation of the action plan for restoration of the river stretches. A District level committee has been constituted which is also known as district task force for overall monitoring of the implementation of the action plan
	Monitoring at state level must take place	Fortnightly commencing 21.12.2019	State level committee meeting under the Chairmanship of the Chief Secretary have been conducted monthly to monitor the overall progress at the state level and River Rejuvenation Committee (RRC) also holding meeting regularly.

Sl. No.	Activity to be monitored	Timeline	Submission of Progress by the State/UTs- Compliance Status
4	**Progress report may be furnished by the states/UTs to** • **Secretary, Ministry of Jal Shakti** • **Member Secretary, CPCB**	Monthly (Preferably before 20th of every month)	Monthly progress report are being sent to NMCG with a copy to CPCB
5.1	**Identification of polluting sources including drains contributing to river pollution and action as per NGT order on in-situ treatment.**	31.03.2021	Identification of all the industries located in and around 500 meters of the Burigaon river stretches has been done. A total of 38 small industries were found in the identified river stretches of Burigaon river. Identification of drains (if any) is being done by the district level monitoring committee. However, wire mesh has been installed in all the drains. Tripura is already declared as ODF state. So, no such Kachha Latrine are there to discharge the human excrita directly in the river water.
5.2	**Status of STPs, I & D and sewerage Networks**	31.03.2022	As the BOD values of the river water and river stretches are within prescribed standard limit, all the ULBs are communicated for installation of FSTP. In addition, all the ULBs has been directed to adopt in-situ Bio-remediation and phyto remediation of sewage in drains.
5.3	**Status of CETPs** **Details of existing CETP and ETP infrastructure, gap analysis proposed**	31.03.2022	**ETP:** Direction has been issued by the Tripura State Pollution Control Board to all industrial units situated at the catchment areas of the river for installation of ETP. ETP has been constructed in almost all the industries where ever required. Though,

Sl. No.	Activity to be monitored	Timeline	Submission of Progress by the State/UTs- Compliance Status
	with completion timeline, No. of industries and complying status.		very small amount of industries have the requirement of installation of ETP. **CETP:** CETP is not required in this specific river stretch as the BOD level is under the prescribed standard.
5.4	**Status of Solid Waste Management and details of processing facilities (Details of Existing Infrastructure, Gap analysis, Proposal along with completion timeline.)**	31.03.2020	Door to Door Collection has been started involving women SHGs . The collected wastes after source segregation are transported to Solid waste processing site at Devendra Chandra Nagar, Agartala.
		31.03.2021	Strengthening of Solid Waste Management Disposal Site is being done.
		Continuous activity.	Sign Board for prohibition of disposal of municipal plastic, bio- medical wastes and other wastes has been displayed at different locations within municipality area. Fitting fixing of wire mesh to protect plastic flow work at four feeder point is going on. Source segregation of different types of wastes is carried out involving women SHGs**.**
			Approximately 11.6 TDP solid waste has been generated under Bishalgarh Municipal Council. All most all the Wards are being engaged with women SHGs for collection and segregation of solid wastes before further disposal into Devendra Chandanagar solid waste disposable site. No such gap found between current status and desirable level.

Sl. No.	Activity to be monitored	Timeline	Submission of Progress by the State/UTs- Compliance Status
5.5	**Latest Water Quality of Polluted river, its tributaries, drains with flow details and ground water quality in the catchment of polluted river.**	Continuous activity	Tripura State Pollution Control Board (TSPCB) is conducting water quality monitoring on monthly basis under National Water Quality Monitoring Programme (NWMP) of Central Pollution Control Board for the following six identified polluted river and river stretches in the State. The month wise latest analytical report in respect of BOD values for the six identified polluted river stretches are at **Annexure-2.**
5.6	**Preventing Dumping of waste and scientific waste management including Bio Medical waste and decentralizing waste processing including waste generated from Hotels and ashrams etc.**	31.03.2021	Dumping of solid wastes is strictly prohibited in river and river stretches by using bylaws. Trainings to all healthcare workers and others, involved in handling of bio-medical waste have been provided at the time of induction. Strict monitoring are being done by the Health department as well as Tripura State Pollution Control Board so that no Bio medical wastes dumped into the river. Amongst the Public Health Facilities 03 state level hospitals namely GBP Hospital, IGM Hospital & Cancer hospital have their own incinerator. Other Public Health Facilities are managing the biomedical waste through disinfection, deep burial & sharp pits. However, one CBWTF Operator has been selected by Health & Family Welfare Department, Govt. of Tripura through open tendering through e-Procurement for the whole State of Tripura to cater to all 126 Public Health Facilities having estimated 4319 beds. Environment Clerance (EC), CTE & BMW Authorisation Certificate has

Sl. No.	Activity to be monitored	Timeline	Submission of Progress by the State/UTs- Compliance Status
			already been issued in favour of the said project. The concerned agency has been instructed to expedite the process for infrastructure development as well as setting up of the facility at an early date.
5.7	**Ground Water regulation**	Continuous activity	Assessment of Ground water in all the identified locations has been done by the Tripura State Pollution Control Board on a regular basis. So far, there is no contamination observed.
		Continuous activity.	Direction has been issued to obtain the NOC from Central Ground Water Authority to all the Industrial units located in the catchment areas of Burigaon River. Many of the units have also submitted the declarations along with the NOC from Central Ground Water Authority.
5.8	**Adopting good irrigation practice**	Continuous activity	Generation of mass awareness to conserve water and also for good irrigation practices is being carried out by the farmers in the catchment areas of Burigaon River.
5.9	**Protection and Management of Flood Plain Zone (FPZ)**	Continuous activity	Bamboo Plantation on sides of the river banks has been done in collaboration with Forest Department, Tripura. Target achieved 100%. Check dam has been installed to maintain the E-flow of the river. The status report of river bank plantation and installation of check dam has been annexed as **(Annexure-5).**
			Regular monitoring is going on to check illegal encroachment.
5.10	Rain Water Harvesting	Continuous activity	All the industries using in the catchment areas responsible for using ground water

Sl. No.	Activity to be monitored	Timeline	Submission of Progress by the State/UTs- Compliance Status
			for industrial purpose is directed to construct rain water harvesting plant and the compliance has been ensured.
5.11	**Environmental Flow (E-Flow)**	31.03.2022	Tender has been invited for installation of digital e-flow meter to monitor the minimum discharge during lean period and records to be maintained monthly basis after installation.
5.12	**Plantation on both sides of the river**	31.03.2020	Extensive river side plantation has been carried out on both sides of the river.
5.13	**Setting up of Bio diversity parks on flood plains by removing encroachments.**	31.03.2022	Extensive river side plantation has been carried out on both sides of the river. Proper monitoring are being done by Concerned District administration to prohibit any kind of illegal encroachment in the river stretches.
5.14	**Awareness Generation**	Continuous activity	Extensive awareness activities are going on involving Eco Club Schools, NGOs and representatives of Urban Local Bodies on continuous basis. Awareness programme is going on in every Friday during village tour headed by District Magistrate & Collector of Sipahijala district and covered Nidaya GP, Killamura ADC Village, Taibandal ADC Village, Rangmala ADC Village, Ramcherra ADC Village , Purba Gakulpur GP, Dhanirampur ADC Village till date, which are situated near the river bank. School level awareness has been done through drama, science seminar and quiz competition for mass awareness generation and restoration of Burigaon river.

Name of the River: GUMTI RIVER (AMARPUR TO TELKAJLA)

Sl. No.	Activity to be monitored	Timeline	Submission of Progress by the State/UTs-Compliance Status
1	**Ensure 100 % treatment of sewage at least in situ remediation**	31.03.2022	All the ULBs has been directed to adopt in-situ Bio-remediation and phyto remediation of sewage in drains. **(Annexure-4).** A comprehensive action plan is under preparation for 100% sewage Management in the state. Finalization of technical specifications/tender documents for installation of 15 Faecal Sludge Treatment Plants (***FSTPs***) of 600 KLD capacity for 15 ULBs including Amarpur. Udaipur & Sonamura ULBs are going on and will be completed shortly.
	Commencement of setting up of STPs and Connecting all the drains and other sources of generation of sewage to the STPs must be ensured	31.03.2022	Channelization including diversion of sewage generated from household townships to sewer lines /interception of all the drains presently carrying sewage will be treated through Bio-remediation process.
2	**Time line for completing all steps of action plans including completion of setting up of STPs and their commissioning**	31.03.2022	All the ULBs has been directed to construct FSTPs as the water quality of all the six rivers and stretches are within prescribed standard. In addition, all the ULBs has been directed to adopt in-situ Bio-remediation and phyto remediation of sewage in drains. **(Annexure-4)**
3	**Chief secretaries**	Continuous	State level committee has been notified under

Proper monitoring are being done by Concerned District administration to prohibit any kind of illegal encroachment in the river stretches.
5.14	**Awareness Generation**	Continuous activity.	Extensive awareness activities are going on involving Eco Club Schools, NGOs and representatives of Urban Local Bodies. Mass awareness programme are organized by the students and teachers in the schools as well as within the villages near the river bank of Gumti river.

Name of River : HAORA RIVER (AGARTALA To CHAMPAKNAGAR STRETCH)

Sl. No.	Activity to be monitored	Timeline	Submission of Progress by the State/UTs-Compliance Status
1	**Ensure 100 % treatment of sewage at least in situ remediation**	31.03.2022	One STP of 8 MLD at Agartala is functional and meets the prescribed standard. The treated water is being reused for gardening and water sprinkling at the road side . A Sewage Treatment Plant (STP) of 8 MLD capacity will be installed in Akhaura ICP (International Check Post). DPR has been prepared. Tenders are invited and bid received

Sl. No.	Activity to be monitored	Timeline	Submission of Progress by the State/UTs-Compliance Status
			from bidders. Tender finalized. Work under Progress. However, all the ULBs has been directed to construct FSTPs as the water quality of all the six rivers and stretches are within prescribed standard. All the ULBs has been directed to adopt in-situ Bio-remediation and phyto remediation of sewage in drains. **(Annexure-4)** Bio remediation to be implemented in all the drains in pilot mode in AMC first. EoI has been floated and two agencies shortlisted. RFP is being prepared now.
	Commencement of setting up of STPs and Connecting all the drains and other sources of generation of sewage to the STPs must be ensured	31.03.2022	Channelization including diversion of sewage generated from household townships to sewer lines /interception of all the drains presently carrying sewage and for ensuring proper treatment through the upcoming STPs will be done after installation of STP. Work order issued for another 8 MLD STP at Agartala at tendered value of Rs 24.73 crore with funding from 10% Lumpsum Scheme & Smart City Mission. Bio remediation to be implemented in all the drains in pilot mode in AMC first. EoI has been floated and two agencies shortlisted. RFP is being prepared now.
2	**Time line for completing all steps of action plans including completion of setting up of STPs and their commissioning**	31.03.2022	All the ULBs have been directed to construct FSTP as the water quality of all the six rivers and stretches are within prescribed standard. In addition, all the ULBs have been directed to adopt in-situ Bio-remediation and phyto remediation of sewage in drains. **(Annexure-4)**

Sl. No.	Activity to be monitored	Timeline	Submission of Progress by the State/UTs-Compliance Status
3	**Chief secretaries may set up appropriate monitoring mechanism at state level. Specifying accountability of nodal Authorities not below the secretary level. Chief may have an accountable person attached in their office for this purpose.**	Continuous activity	State level committee has been notified under the chairmanship of Chief Secretary to Monitor the overall progress of the compliance. In addition, a committee has been constituted namely the River Rejuvenation Committee (RRC) to look after the progress of the implementation of the action plan for restoration of the river stretches. A district level committee has been constituted which is also known as district task force for overall monitoring of the implementation of the action plan
	Monitoring at state level must take place	Fortnightly commencing 21.12.2019	State level committee meeting under the chairmanship of the Chief Secretary have been conducted monthly to monitor the overall progress at the state level and River Rejuvenation Committee (RRC) also holding meeting regularly.
4	**Progress report may be furnished by the states/UTs to** • **Secretary, Ministry of Jal Shakti** • **Member Secretary, CPCB**	Monthly (Preferably before 20th of every month)	Monthly progress report are being sent to NMCG with a copy to CPCB
5.1	**Identification of polluting sources including drains contributing to river pollution**	31.03.2021	Identification of all the industries located in and around 500 meters of the Haora river stretches has been done. A total of 97 small industries were found in the identified river stretches of Haora river.

Sl. No.	Activity to be monitored	Timeline	Submission of Progress by the State/UTs-Compliance Status
	and action as per NGT order on in-situ treatment.		Identification of drains (if any) is being done by the district level monitoring committee. However, wire mesh has been installed in all the drains. Tripura is already declared as ODF state. So, no such Kachha Latrine are there to discharge the human excrita directly in the river water.
5.2	**Status of STPs, I & D and sewerage Networks**	31.03.2022	As the BOD values of the river water and river stretches are within prescribed standard limit, all the ULBs are communicated for installation of FSTP.
5.3	**Status of CETPs** **Details of existing CETP and ETP infrastructure, gap analysis proposed with completion timeline, No. of industries and complying status.**	31.03.2022	**ETP:** Direction has been issued by the Tripura State Pollution Control Board to all industrial units situated at the catchment areas of the river for installation of ETP. ETP has been constructed in almost all the industries where ever required. Though, very small amount of industries have the requirement of installation of ETP. **CETP:** There is only one (01) CETP of 500 KLD capacities setup at Bodhjungnagar Industrial Complex in the State of Tripura. At present the plant is running smoothly. The CETP is connected with Effluent generating Units through common pipe line for transportation of Effluent to the plant for treatment purpose. Effluent is being treated in CETP at different stage so as to make the content of impurities up to a permissible limit as per guide line of Tripura State Pollution Control Board (TSPCB). It is complying with the effluent standards.
5.4	**Status of Solid Waste Management and details of processing facilities (Details of**	31.03.2020	Door to Door Collection has been started involving women SHGs . The collected wastes after source segregation are transported to Solid waste processing site at Devendra Chandra Nagar, Agartala.

5.11	**Environmental Flow (E-Flow)**	31.03.2022	Tender has been invited for installation of digital e-flow meter to monitor the minimum discharge during lean period and records to be maintained monthly basis after installation.
5.12	**Plantation on both sides of the river**	31.03.2020	Extensive river side plantation has been carried out on both sides of the river.
5.13	**Setting up of Bio diversity parks on flood plains by removing encroachments.**	31.03.2022	Extensive river side plantation has been carried out on both sides of the river. Proper monitoring are being done by Concerned District administration to prohibit any kind of illegal encroachment in the river stretches.
5.14	**Awareness Generation**	Continuous activity	Extensive awareness activities are going on involving Eco Club Schools, NGOs and representatives of Urban Local Bodies. Directorate of Higher Education have taken many initiative involving the students for restoration of Manu river through rally, discussion, under Kailasahar & Kumarghat Subdivision about the river water pollution.

Annexure-1

Minutes of the meeting of River Rejuvenation Committee, Tripura held on 08/06/2020 at 11.00 am in the Chamber of the Director, Science, Technology & Environment Department, Government of Tripura

The meeting of River Rejuvenation Committee, Tripura held on 08/06/2020 at 11.00 am in the Chamber of the Director, Science, Technology & Environment Department. The following officers were attended the meeting.

i) Sri Animesh Das, Director, Science, Technology & Environment Department, Government of Tripura

ii) Sri Sutirtha Paul, Joint Director, Department of I & C, Government of Tripura [Represented Director, Department of I & C]

iii) Sri Ashim Saha, Joint Director, Urban Development Department, Government of Tripura [Represented Director, Urban Development Department]

iv) Sri Bishu Karmakar, Member Secretary, Tripura State Pollution Control Board

Sri Animesh Das, Director, Science, Technology & Environment Department, Government of Tripura and Chairman, River Rejuvenation Committee, Tripura reviewed the last minutes of the meeting of River Rejuvenation Committee, Tripura held on 05/02/2020 regarding 6 identified polluted river stretches based on the directions of Hon'ble NGT in the matter OA No. 673 of 2018 and the direction dated 28/02/2020 of Hon'ble NGT in the matter of OA No. 606/ 2018.

Sri Bishu Karmakar, Member Secretary, Tripura State Pollution Control Board raised the issues such as Phyto remediation/bio remediation of drains discharge into river and setting up of STP in OA No. 673 of 2018 in the matter of polluted river stretch and the direction of Hon'ble NGT dated 28/02/2020 in the matter of OA No. 606/ 2018. The matter was discussed in the meeting.

After threadbare discussions the following decisions were taken:

i) The 17 nos. of drains in Agartala have been identified by the Agartala Municipal Corporation. In 1st phase, the Expression of Interest has been invited for execution of phyto/ bio remediation works for 5 nos. of identified drains under Agartala Municipal Corporation on pilot mode. The technical evaluation of tender document is under process. The identification of drains discharged into six identified river stretches in other ULBs is going on. The phyto/bio remediation works for the other identified drains of ULBs will be taken up by concerned ULBs in a phased manner.

ii) In compliance of the direction of NGT dated 28.02.2020 in the matter of OA No. 606/ 2018, the Urban Development Department will take necessary steps to complete the ongoing projects of setting up of STPs within 31.03.2021.

iii) For initiation of phyto/bio remediation works in the drains, it is required to assess the BOD level of the each drain. The Urban Development Department will make an inventory of drains discharged into the six identified river stretches. The ULB wise list of such drains will be provided to the Tripura State Pollution Control Board for assessment of BOD level.

iv) All the concerned departments/organizations will be requested to take necessary effort for effective implementation of the Action Plan for restoration of the six identified river stretches. The concerned departments/organizations will also submit the monthly action taken report on implementation of the said Action Plan to the Tripura State Pollution Control Board.

v) The Tripura State Pollution Control Board will take necessary steps to provide the Monthly Progress Report (MPR) on implementation of Action Plan for rejuvenation of 6 identified Polluted River Stretches to NMCG with a copy to CPCB on regular basis.

The meeting ended with thanks to the chair.
