**Monthly Progress Report for the month of May, 2025 in the
matter of Hon'ble NGT OA No. 673 of 2018 order Dated
24/09/2020 for the State of Chhattisgarh**

Overall status of the State

- I. **Total Population :** Urban Population – 57.17 Lakhs (as per 2011 census)
Present Urban Population – 74.45 Lakhs
Rural Population – 1,96,07,961 (as per 2011 census)

II. **Estimated Sewage Generation (MLD) :** 707.84 MLD

- a. In the state of Chhattisgarh having 190 ULBs, sewerage network is only available in 01ULB i.e., Bilaspur Municipal Corporation. There are 02 functional STPs in Bilaspur with 71 MLD capacity. In addition to that. 3STPs are under construction with combined capacity of 22 MLD. As there is no sewerage system in other ULBs of the State, so the sewage generations have been calculated considering the sewage flow in the major drains of the ULBs. Raipur Municipal Corporation has developed 04 STPs of combined capacity 206 MLD based on SBR technology at Chandandih-75 MLD, Kara-35 MLD, Nimora-90 MLD and Bhatagaon-6.0 MLD near River kharun to treat the waste water from 17 major drains of 70 wards of Raipur. In Kawardha, one STP of 2.1MLD capacity is operational at Mini Mata Chowk. State has developed 04 STPs of 63.2 MLD capacity under AMRUT mission in Raigarh, Rajnandgaon & Jagdalpur 07 STPs of 58.2 MLD capacity from the state budget in Nawapara, Rajim, Dhamtari & Nava Raipur. State is developing 01 STP of 33 MLD capacity in co-ordination with M/s NTPC at Korba.
- b. The state has developed about 907.0 MLD capacity of STP for the treatment of used water from the urban households through
- i. 22 Operational STPs (446 MLD),
 - ii. 05 Under Construction STPs (37.3 MLD) and
 - iii. 14 STPs (423.7 MLD) under planning stage.
- c. In Chhattisgarh, most of the urban households are relied on on-site sanitation systems such as Septic Tanks, Pits latrines and twins pits. So, all ULBs have established Faecal sludge treatment facility for the treatment for the treatment of septage generated from the households of the ULBs. A total number of 159 ULBs have Faecal Sludge Treatment Plants(FSTP) based on Low-cost gravity based planted drying beds for the treatment of black water generated in these ULBs. The 10 ULBs namely Raipur, Raigarh, Bilaspur, Durg, Risali, Bhilai, Korba, Jagdalpur, Kawardha and Kirodimal Nagar are using nearby STPs for co-treatment of septage.
- d. 5 STPs in ULBs namely Kumhari (80 MLD), Sakti (4MLD), Shivrinarayan (2.2 MLD), Dantewada (2.8 MLD) and Chandrapur (1.7 MLD) are proposed under state dudget and STPs in 05 AMRUT cities

namely Durg (77.0 MLD), Bhilai (150 MLD), Korba (33 MLD) and Ambikapur (32.0 MLD) and Rajnandgaon (41 MLD) are proposed under AMRUT budget, which will further reduce the gap and strengthen the waste water management facilities in the State of Chhattisgarh.

- e. Therefore, there is zero gap in wastewater management in Urban areas of Chhattisgarh and the total sewage & septage generated from all the households of the ULBs is being treated by the STPs and FSTPs respective.

III. Details of Sewage Treatment Plant

- **Existing no. of STPs and Treatment Capacity (in MLD) :** 22 STPs with total treatment capacity of 446 MLD

- **No. of Proposed STPs and Treatment Capacity (in MLD):** 14 STPs with total treatment capacity of 423.7 MLD.
- **MLD of sewage being treated through Alternate technology :** 160 ULBs is being treated through FSTPs (Low-cost gravity based Planted Drying Bed) and in 09 ULBs treatment of faecal sludge from septic tank is done through co-treatment with STPs. **Annexure – 1.**
- **Gap in Treatment Capacity in MLD :** 403.21 MLD
- **No. of Operational STPs :** 22
- **No. of Complying STPs :** 22
