**Monthly Progress Report for the month of December, 2025 in
the matter of Hon'ble NGT OA No. 673 of 2018 order Dated
24/09/2020 for the State of Chhattisgarh**

Overall status of the State

- I. **Total Population** : Urban population – 57.17 Lakhs (as per 2011 census)
Current estimated urban population – 76.7 Lakhs
Rural population – 1,96,07,961 (as per 2011 census)
- II. **Estimated Sewage Generation (MLD)** : 726.45 MLD
- a. In the state of Chhattisgarh having 192 ULBs, sewerage network is only available in 01 ULB i.e., Bilaspur Municipal Corporation. There are 03 functional STPs in Bilaspur with 77.0 MLD capacity. In addition to that, 2STPs are under construction with combined capacity of 16.0 MLD. As there is no sewerage system in other ULBs of the State, so the sewage generations have been calculated considering the sewage flow in the major drains of the ULBs. Raipur Municipal Corporation has developed 04 STPs of combined capacity 206 MLD based on SBR technology at Chandandih-75.0 MLD, Kara-35.0 MLD, Nimora-90.0 MLD and Bhatagaon-6.0 MLD near River kharun to treat the waste water from 17 major drains of 70 wards of Raipur. In Kawardha, one STP of 2.1MLD capacity is operational at Mini Mata Chowk. State has developed 04 STPs of 63.2 MLD capacity under AMRUT mission in Raigarh, Rajnandgaon & Jagdalpur 07 STPs of 58.2 MLD capacity from the state budget in Nawapara, Rajim, Dhamtari & Nava Raipur. State is developing 01 STP of 33 MLD capacity in co-ordination with M/s NTPC at Korba.
- b. The state has developed about 827.0 MLD capacity of STP for the treatment of used water from the urban households through
- i. 24 Operational STPs (457.3 MLD),
 - ii. 03 Under Construction STPs (26 MLD) and
 - iii. 13 STPs (343.7 MLD) under planning stage.
- c. In Chhattisgarh, most of the urban households are relied on on-site sanitation systems such as Septic Tanks, Pits latrines and twins pits. So, all ULBs have established Faecal sludge treatment facility for the treatment for the treatment of septage generated from the households of the ULBs. A total number of 160 ULBs have Faecal Sludge Treatment Plants (FSTP) based on Low-cost gravity based planted drying beds for the treatment of black water generated in these ULBs. The 10 ULBs namely Raipur, Raigarh, Bilaspur, Durg, Risali, Bhilai, Korba, Jagdalpur, Kawardha and Kirodimal Nagar are using nearby STPs for co-treatment of septage.
- d. 04 STPs in ULBs namely Sakti (4.0 MLD), Shivrinarayan (2.2 MLD), Dantewada (2.8 MLD) and Chandrapur (1.7 MLD) are proposed under state dudget and STPs in 05 AMRUT cities namely Durg (77.0 MLD), Bhilai (150 MLD), Korba (33.0 MLD) and Ambikapur (32.0 MLD) and Rajnandgaon (41.0 MLD) are proposed under AMRUT budget, which will

further reduce the gap and strengthen the waste water management facilities in the State of Chhattisgarh.

- e. Therefore, there is zero gap in wastewater management in Urban areas of Chhattisgarh and the total sewage & septage generated from all the households of the ULBs is being treated by the STPs and FSTPs respective.

III. Details of Sewage Treatment Plant

- **Existing no. of Operational STPs and Treatment Capacity (in MLD) : 24**
STPs with total treatment capacity of 457.3 MLD

STPs with total treatment capacity of 26 MLD.
- **No. of Proposed STPs and Treatment Capacity (in MLD): 13** STPs with total treatment capacity of 343.7 MLD.
- **MLD of sewage being treated through Alternate technology : 160** ULBs is being treated through FSTPs (Low-cost gravity based Planted Drying Bed) and in 09 ULBs treatment of faecal sludge from septic tank is done through co-treatment with STPs. **Annexure – 1.**
- **Gap in Treatment Capacity in MLD : 410.87 MLD**
- **No. of Operational STPs : 24**
- **No. of Complying STPs : 24**
